Abstract of JP9228129

PROBLEM TO BE SOLVED: To obtain a wig hard to feel sultriness excellent in durability by hair transplanting to compose a parting on a fine meshed configuration having a fine mesh as a texture sheet part. **SOLUTION:** This wig constitutes of a sheet formed net 11 for putting on the head of a wearer which is hair transplanted with hair 13 and the hair for comprising parting 13a is transplanted on the texture sheet part 16 mounted at the area from the center 14 of the whirl of hair of the hair 13 to the parting 15. The rough meshed configuration 18 forming net formed sheet 11 and fine meshed configuration 19 forming texture sheet 16 are constituted of wefts and warps made of synthetic resin having excellent weather durability, preventing the outbreak of crack fissure and depilation. The wig is capable of simply reproducing by removing the texture sheet part 16 and attaching a new fine meshed configuration and only transplanting the hair for constituting parting 13a.
